

My wife and myself have been involved with the Quixtar business since it's incorporation in 1999. Since our professional incomes were replaced thru the Quixtar business opportunity, for the last 5 years I have been full-time involved in the business. This business has given us considerable income and has also given us a lot of free time. We have an opportunity to spend considerable time with our children and be involved in their school and sports activities. Both our kids are 'A' grade students and our elder daughter is a 'distinguished honor role' student. We are extremely happy with the professionalism of the Quixtar corporation and would encourage others to look at this business very seriously. We never ever had any problems or conflicts while doing our business. We do share the same Quixtar opportunity to prospects and have always been very professional in our approach. All necessary information including the income potential is provided to the prospect to make an informed decision to pursue the business. The quixtar business opportunity is available to anyone who wants to create additional income for themselves. To get started we let the prospects know that there is a registration fees of about \$60 and an optional product bundle for about \$150. Quixtar has a money-back satisfaction guarantee on all products for about 6 months. In case the prospect signs up for the business but wants to get a refund, Quixtar has always been good with the refund of the registration fees as well as return of the products. In my opinion Quixtar provides an excellent source of income without impacting anyone's current source of income. The information provided to the prospect is adequate and I definitely feel that in this age and time, prospects could make an informed decision right away, there is no need for a waiting period. Having a busy life other things will get in the way and a great opportunity that a prospect may have seen may get lost because they did not get started in the business. Anyway the registration and products are money-back guaranteed. There is nothing to lose except something to gain from getting started in the Quixtar business. With this information age that we live in there is enough information that the prospect has to make an informed decision. There is also many opportunities for the prospect to meet other business owners before they make the decision to become business owners themselves. We love the business and are very happy and thankful that we started right away when we saw the opportunity. Yes, we have worked hard to achieve the level of success we have, but it was all worth it. I honestly would encourage people to look at the Quixtar business as it does not require any major investment but the rewards could be tremendous.

With regards,

- Vishal & Sonika Jain
